

**making a natter box**

# You will need...

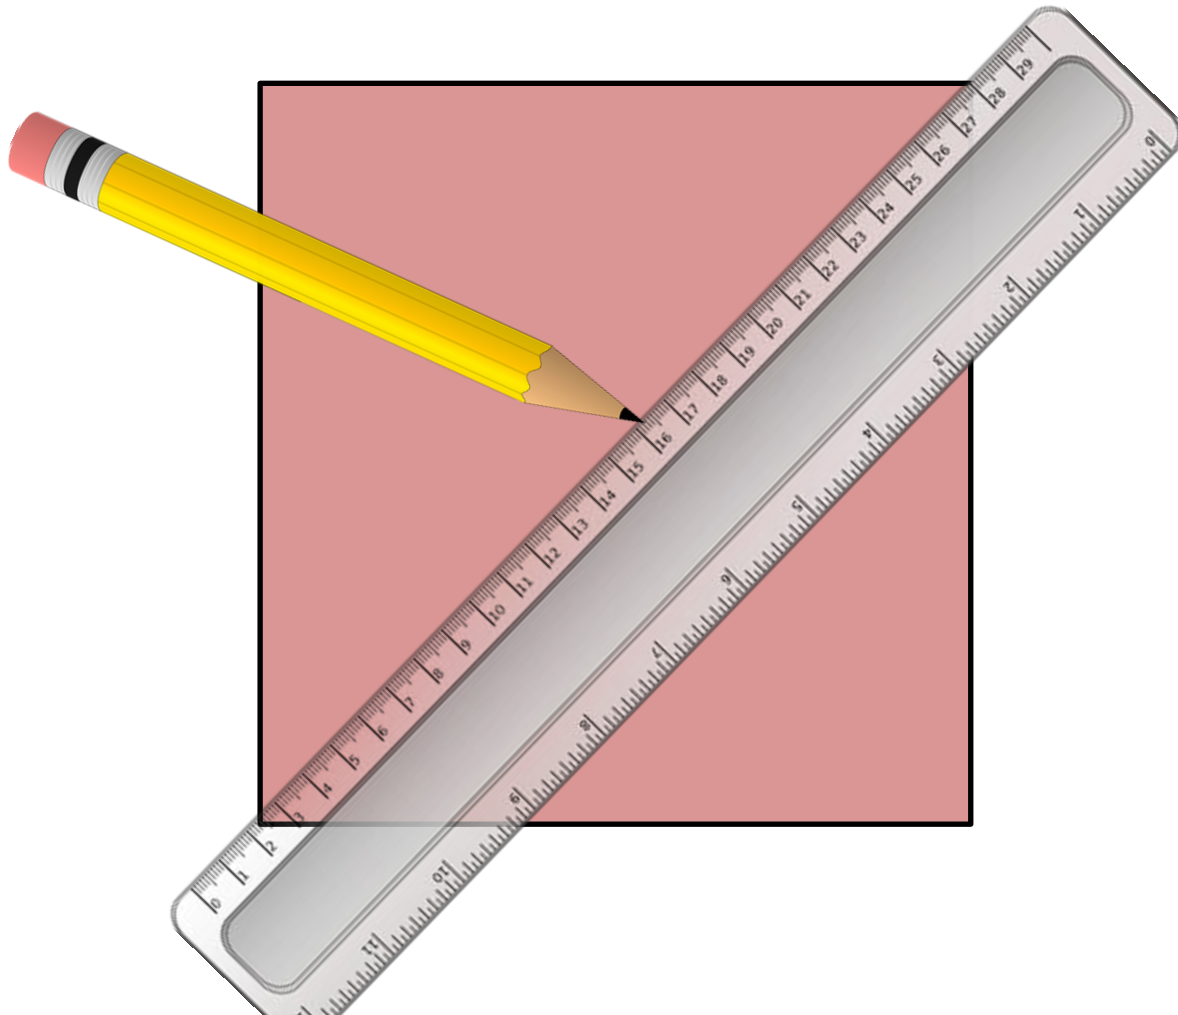

- 2 squares of thick paper or thin card. They must be exact squares and one must be 1 cm smaller than the other.
- Ruler
- Pencil
- Scissors
- Glue stick
- Imagination

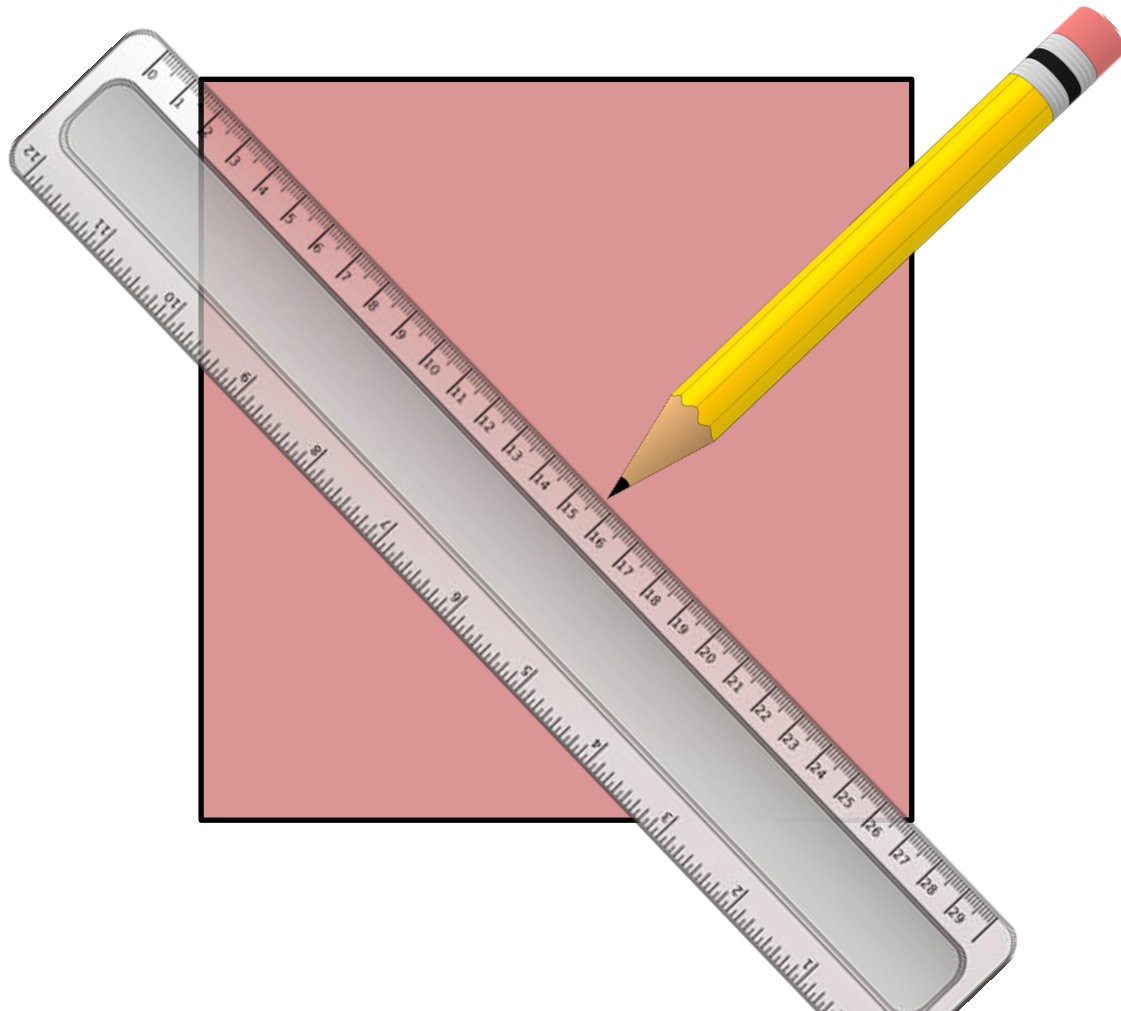

Choose two squares – one big, one smaller (by 1 cm)

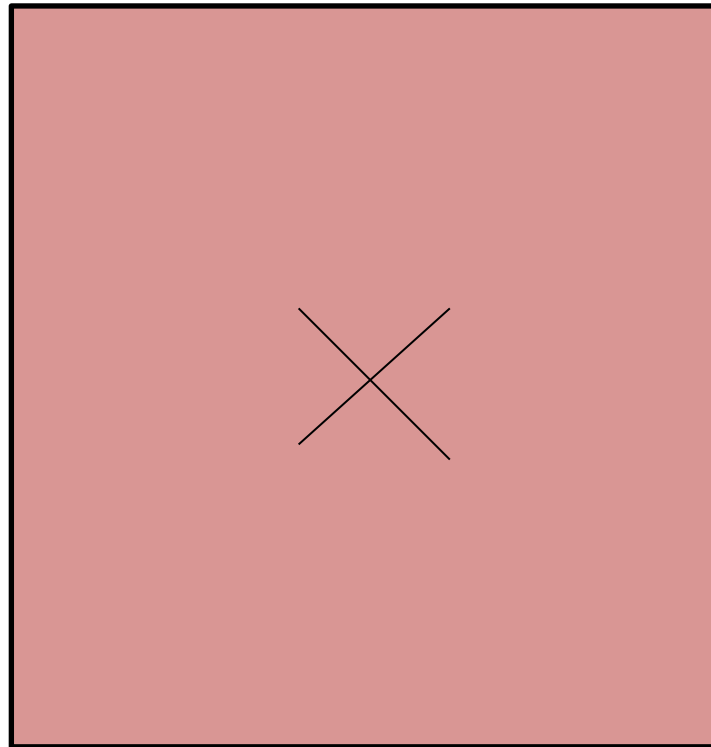

Use a ruler to find the middle point of your first square

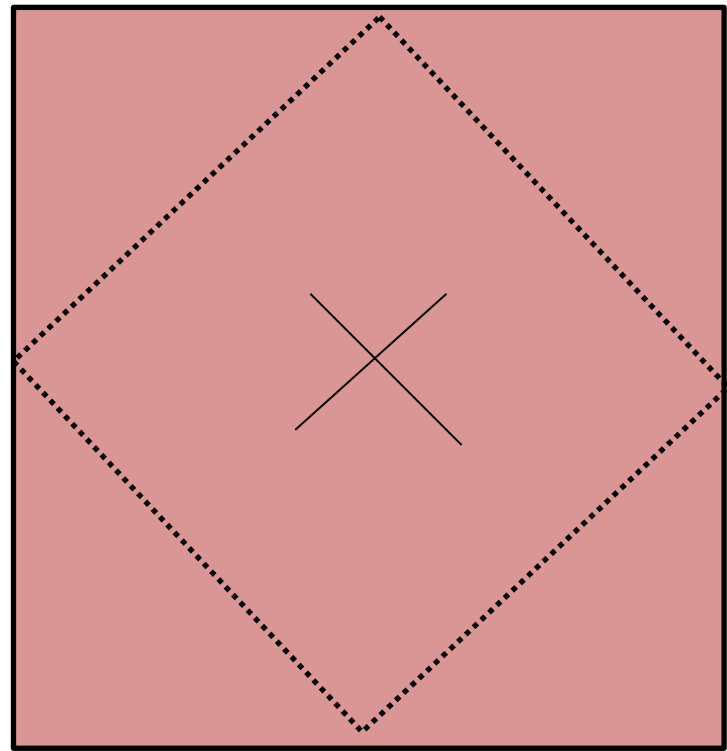

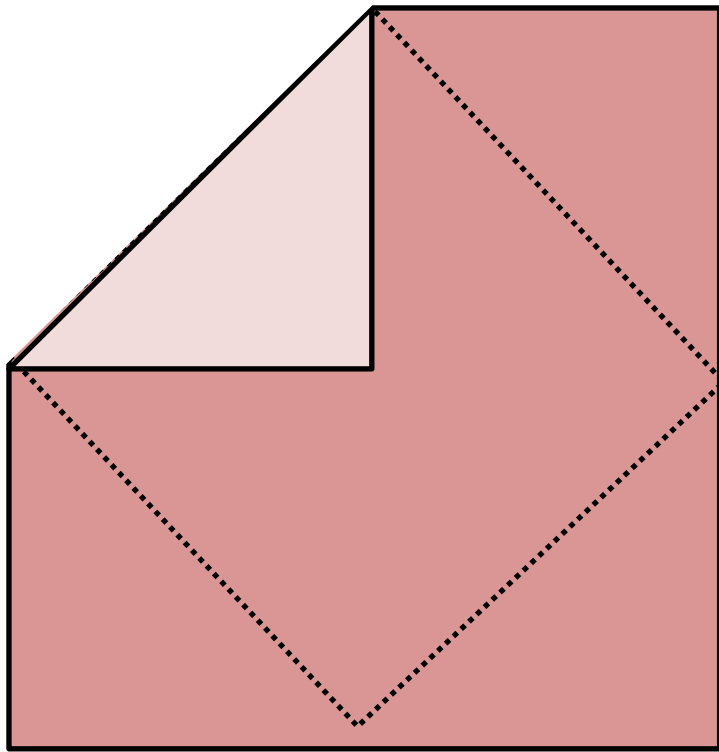

Use a ruler to find the middle point of your square

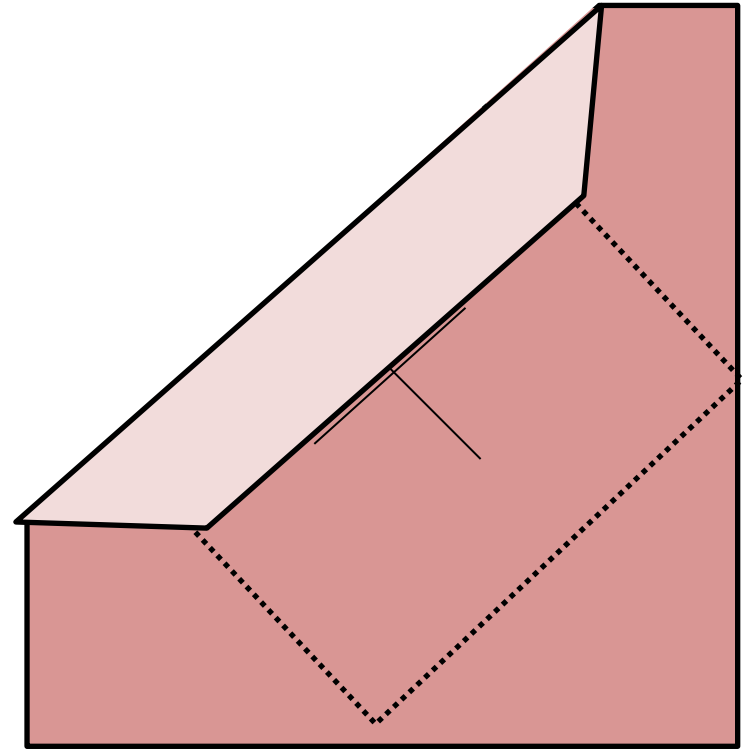

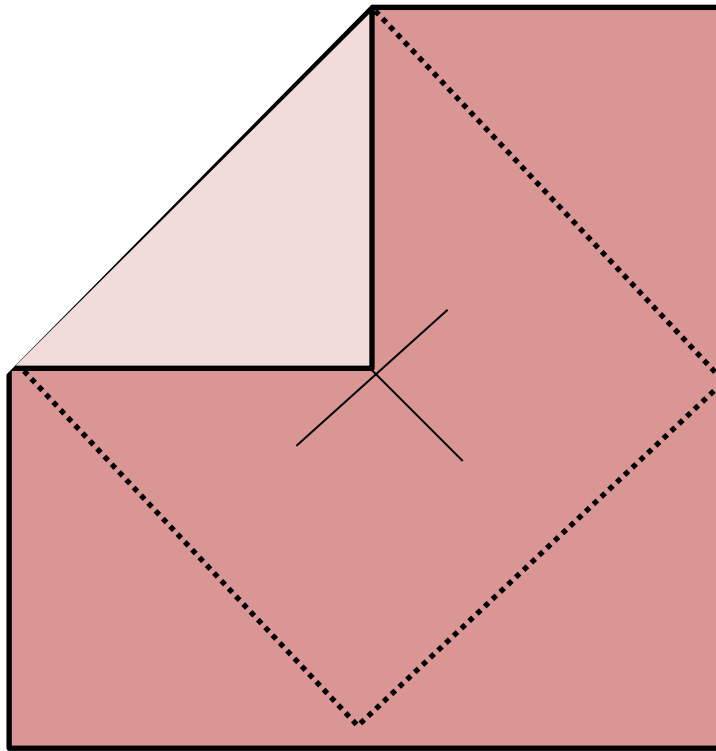

It should now look like this

Now fold each corner in to touch the middle point – press down to make sharp creases and open out

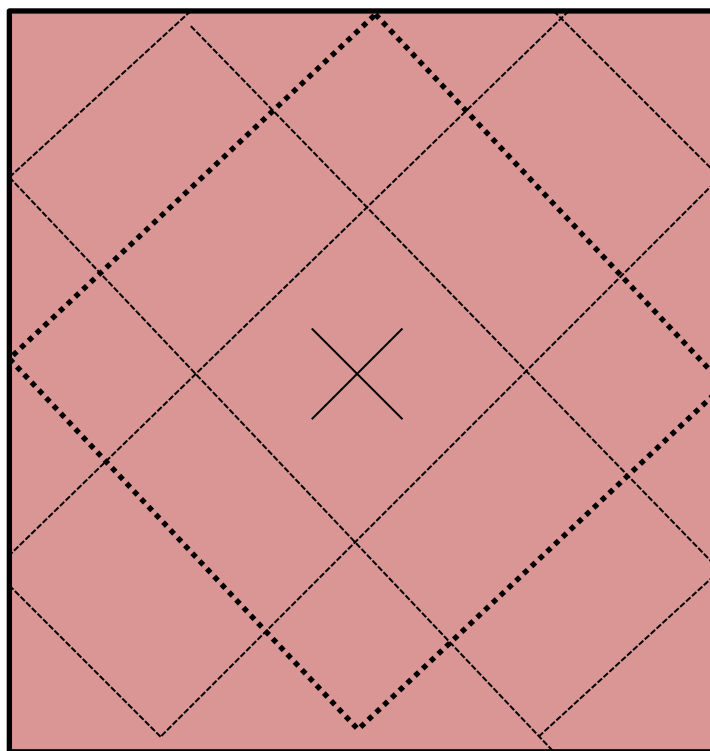

Now re-fold one at a time and make an extra fold towards the middle point from each corner

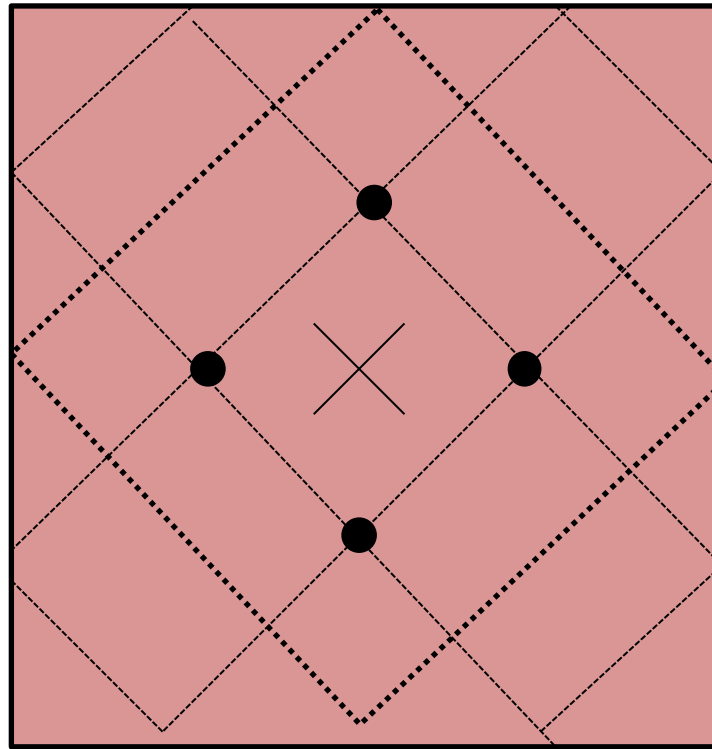

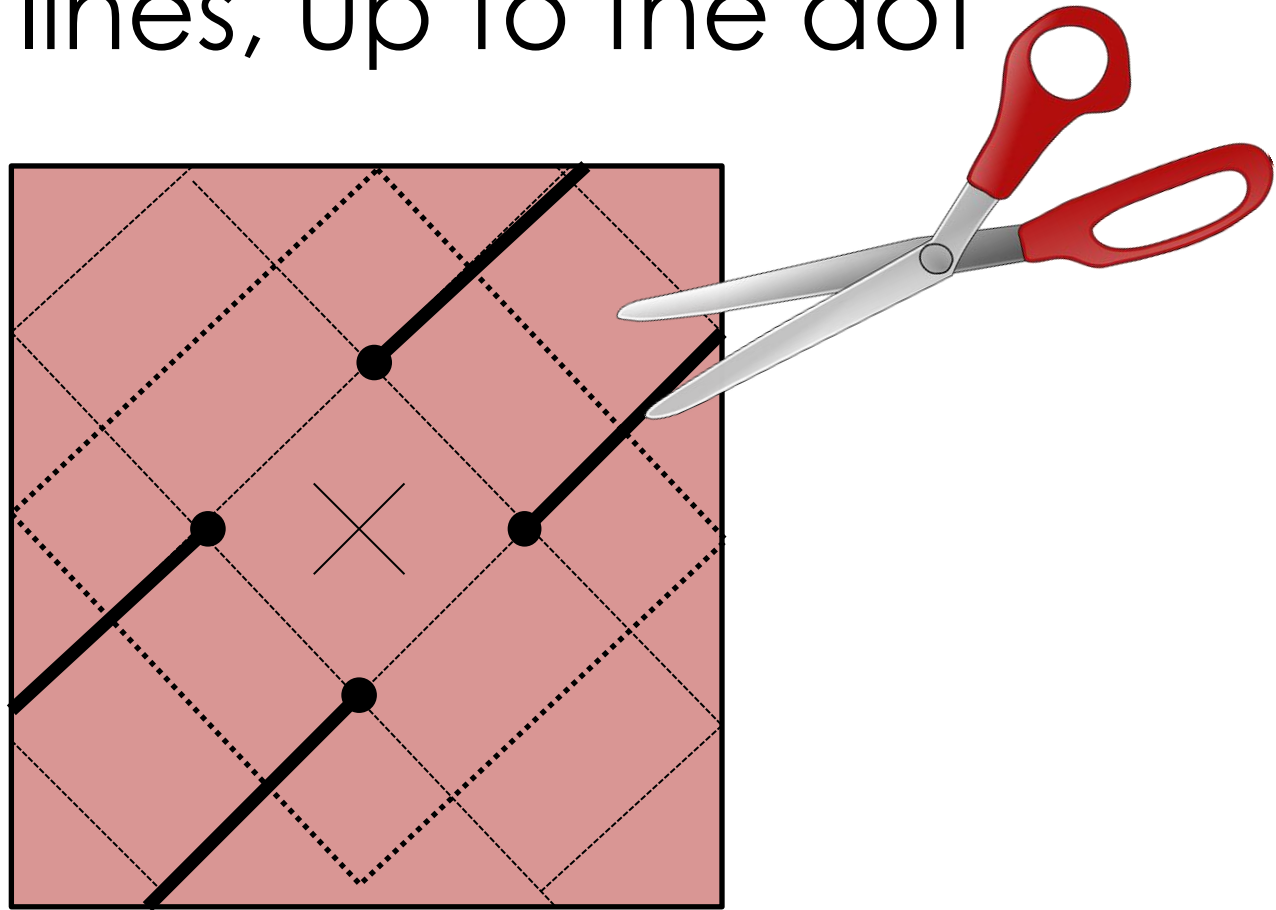

Open it out and it should look a bit like this

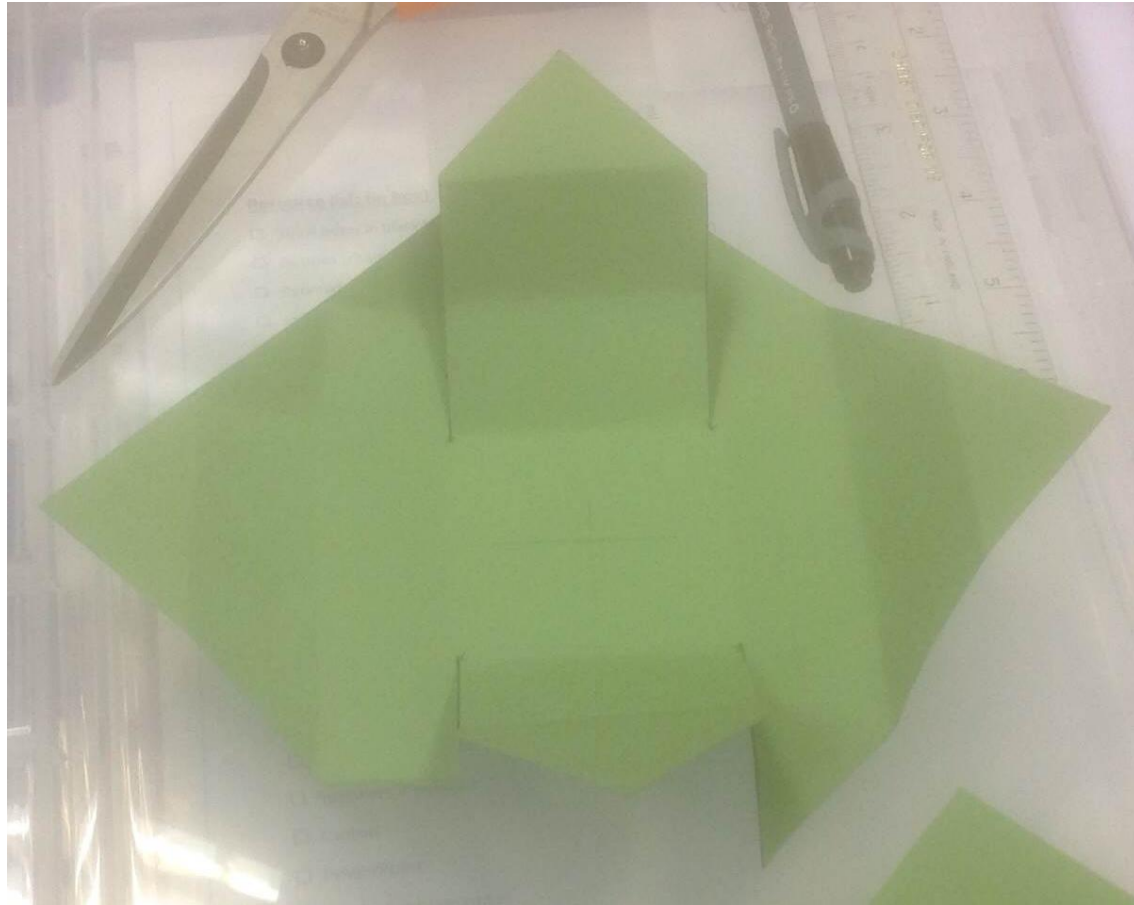

Look for the square in the centre  
and mark each corner with a dot

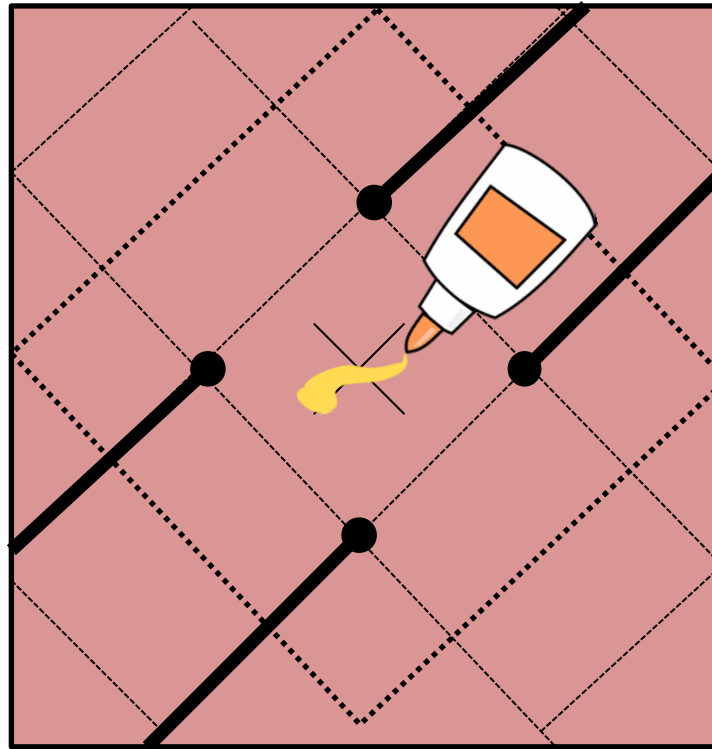

Draw four lines, from the dots to the edge of the paper, then cut along these lines, up to the dot

It should look a bit like this!

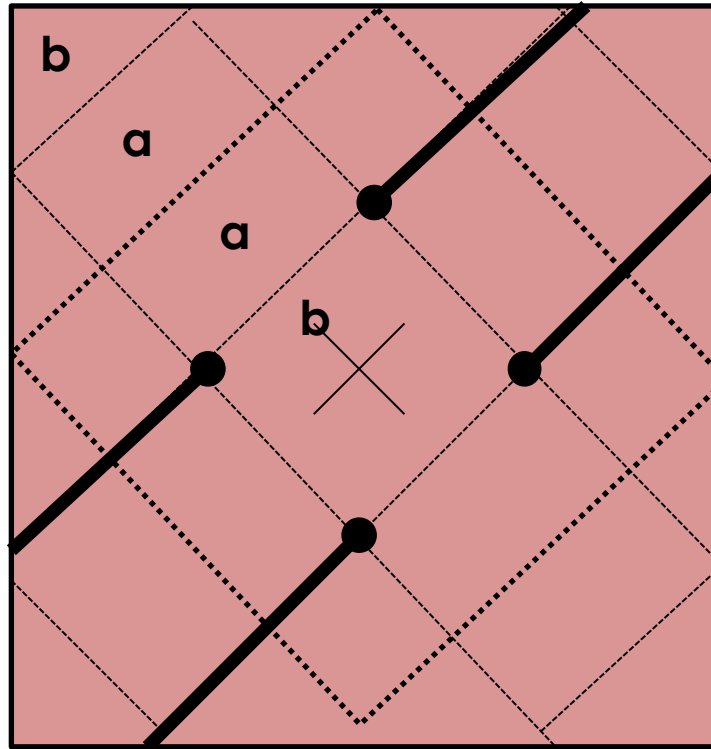

Put some glue in the centre square

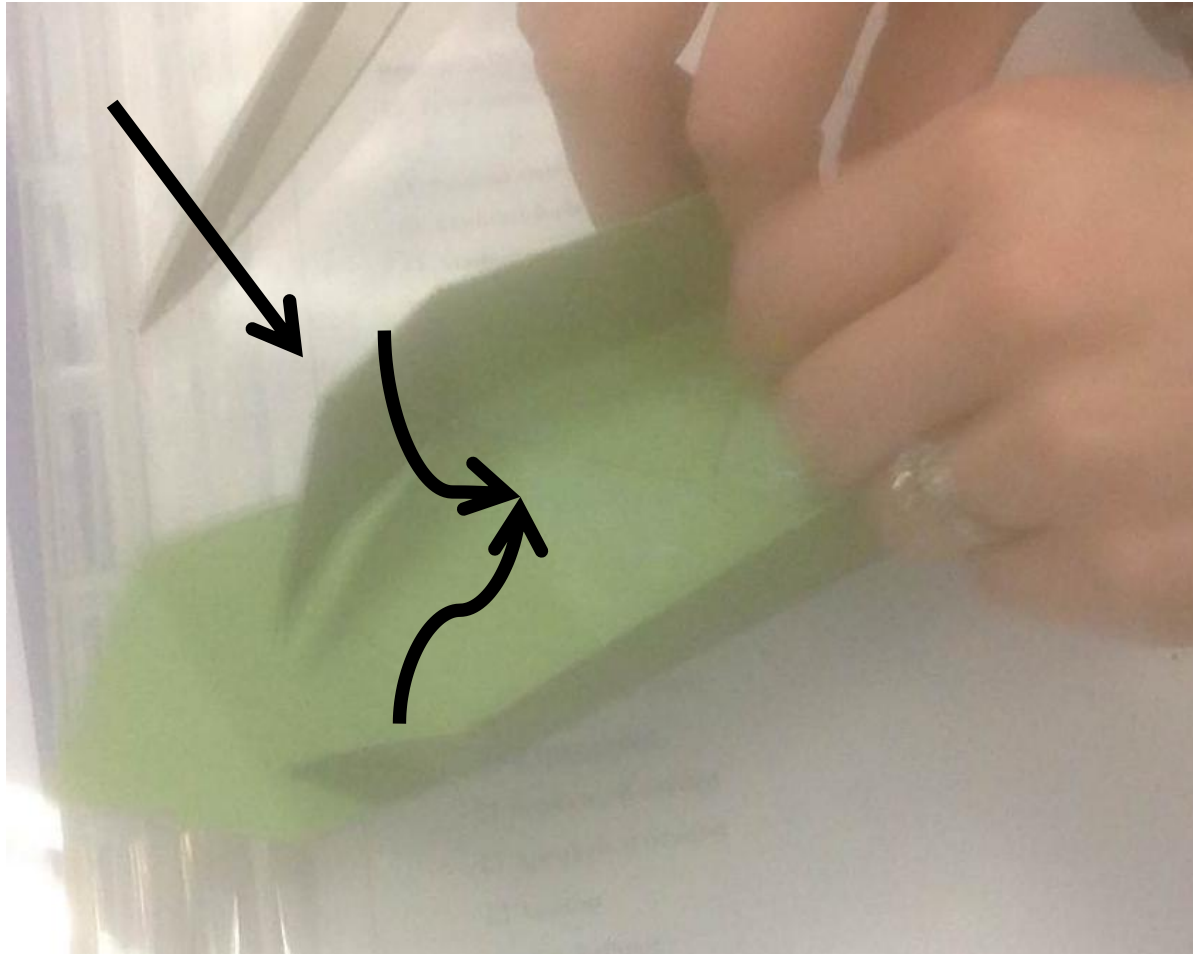

Fold these corners inwards to make the walls of your box

**a** should fold to touch **a**

**b** should fold over to touch **b**

Does it look a bit like this? Fold the sides of the box towards each other

Wrap the two pointed strips over and stick to the base of the box

Now repeat for the other square!

Now think of what to put in your  
natter boxes and send us your  
photographs!
